

Webasto Mode 3 Charging Cable Type 2

Charge on the Go

The Mode 3 Charging Cable connects an electric car to a charging station with a type 2 connection. It enables charging on the go at public charging stations or those with a charging socket.

Key facts at a glance:

- For all electric cars and plug-in hybrids with type 2 connectors
- Designed for charging capacity of up to 22 kW
- High charging capacity with three-phase charging cable
- VDE certification: the seal of approval for quality and safety
- 4.5m cable length guarantees flexible charging

Technical specifications	
Electrical characteristics	
Rated Current (A)	up to 32
Rated Voltage (V AC)	up to 480
Number of phases	3-phase
Charging power (kW)	up to 22
Standard	IEC 62196-2
Approval	VDE
Color	Black
Manufacturer	HARTING Deutschland GmbH & Co. KG
